Durell Control Systems Inc.
3392 Wonderland Rd S
Building 9, Unit 1 & 2
London ON N6L 1A8

To Whom It May Concern,

I am pleased to write a letter of reference for Durell Control Systems Inc. Nazem About Chami and his team at Durell were hired by the Elgin St. Thomas Board of Health to install our data cabling infrastructure in our new, two-storey, 30,000 sq. ft. building. This involved 400 data drops including the IT rack installation and setup.

Durell also installed the public address system with office individual volume controls which included integrating with our phone system, sound masking system and other meeting room amplifiers. A new web based Building Automation System was also installed to control the heating and cooling systems utilizing a 3D graphics user interface.

Throughout the project we came to rely on the Durell team for their professionalism and prompt response time regardless of several setbacks they encountered throughout the project. The quality of work and attention to detail was outstanding and the Durell team was very easy to work with.

I would not hesitate to recommend Durell for any control system project. If you have further questions, I may be contacted at 519-631-9900, ext. 1202.

Sincerely,

A handwritten signature in black ink that reads "Cynthia St. John".

Cynthia St. John
Executive Director
Elgin St. Thomas Public Health
